

Company Overview

Entegris, Inc. (NASDAQ: ENTG) provides solutions for advanced manufacturing in an expanding array of high-technology industries, including semiconductor, micro-electronics, alternative energy and life sciences.

These solutions include: wafer carriers and shippers that protect semiconductor wafers and solar cells from contamination and breakage; filtration products that purify process gases and fluids, as well as the ambient environment; liquid systems and components that dispense, control or transport process fluids; specialty coatings that provide high-purity surfaces for wear-resistance, corrosion protection and smoothness; premium graphite and silicon carbide for high-performance applications; and shippers and trays for protecting and transporting disk drive components.

Entegris primarily sells direct to its customers, which include virtually every maker of semiconductors, flat panel displays and data storage devices as well as suppliers of fabrication equipment, wafers, substrates and high-technology products.

Leading Through Innovation

For more than 40 years, Entegris' innovative materials-science solutions have enabled the cost-effective production of increasingly complex generations of semiconductors and electronics.

Entegris core competencies include:

- **Materials science:** The study of the characteristics and uses of materials such as polymers, metals, semiconductors, graphite, silicon carbide and ceramics commonly used in the world's leading technology products.
- **Separation science:** The use of techniques to facilitate the separation, purification and analysis of complex mixtures of organic and inorganic compounds. Customers rely upon these separation techniques to precisely control micro and molecular contamination.

These competencies, optimized with the company's worldwide manufacturing capabilities, enable Entegris to provide the highest level of contamination control, improving their flexibility and decreasing cost.

Industry Partnerships

Entegris partners with industry leaders in the semiconductor and other high-tech industries to ensure that its customers can take full advantage of the latest advances in contamination control and filtration. Entegris also has unique research and development relationships with manufacturers around the world.

In addition to its strategic partners, Entegris is an active member of the International Technology Roadmap for Semiconductors (ITRS), SEMI and other industry groups that work to create specifications, standards and practices for the improvement of high-technology industries.

QUICK FACTS

Headquartered in Billerica, MA, with a global infrastructure of manufacturing, service centers and research facilities in the United States, Malaysia, Singapore, Taiwan, China, Korea, Japan, Israel, Germany and France

Fiscal 2010 sales of \$688 million

Holds 287 U.S. patents and 593 patents in other countries

Approximately 2,800 employees worldwide

Traded on NASDAQ under ENTG

www.entegris.com

MILESTONES

1966 – Founded as Fluoroware, Inc.

2000 – Begins trading under the ENTG symbol on NASDAQ

2005 – Merges with Mykrolis Corporation, a leading provider of liquid filtration and gas purification products and systems

2006 – Expands manufacturing facility in Kulim, Malaysia

2007 – Acquires Surmet Corporation's high-purity semiconductor coatings business

2008 – Acquires Poco Graphite, an industry leader in high-performance graphite and silicon carbide

2011 – Opens manufacturing facility in Hsinchu, Taiwan

EXECUTIVE MANAGEMENT

Gideon Argov, President and Chief Executive Officer

Bertrand Loy, Executive Vice President and COO

Gregory B. Graves, Executive Vice President and CFO

Paul L. H. Olson, Chairman of the Board
