

F10EVO™ DISK SHIPPER

New, evolutionary design dramatically improves disk yield

Features

- Traditional F10 footprint and profile requires minimal modification for cover attachment/removal (lidding and de-lidding)
- New, evolutionary latch design secures to the bottom cover to form a tighter seal against external contaminants
- New cover latching mechanism, located below cassette “U” wall, prevents the passage of particles caused by closure, increasing yield on disks one and twenty-five
- New “living hinge” allows flexibility to ease manual top cover removal and attachment, increasing overall throughput
- Existing secondary packaging is unaffected
- Available with “Ultra” low outgassing top and bottom covers

Specifications

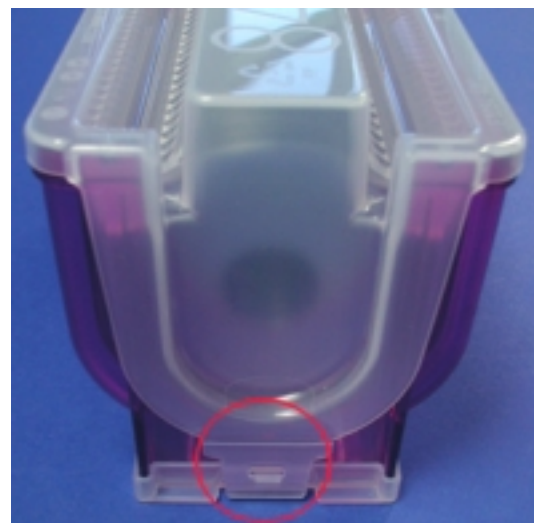

F10EVO designed for following form factors:

- 95, 84 and 65 mm
