

200 mm Process Carrier Handles

PFA handles for use with traditional, high- and low-profile 200 mm process wafer carriers used in wet processing

Entegris offers end-load and slingshot style handles for use with traditional, high- and low-profile 200 mm process wafer carriers used in wet processing applications. Molded from natural PFA material, the handles provide broad chemical compatibility in numerous high-purity, corrosive applications. The robust, durable design allows reliable handling of traditional process carriers up to 50 capacity. The one-piece molded construction does not require assembly and is ready to use.

End-Load Style

To use, slip the handle through the handle slot on the carrier end wall. Press the handle down until the angles edges on the bottom of the handle are past the bottom of the carrier's solid end wall, then pull up.

Slingshot Style

To use, simply slip the handle grooves over the carrier's top flanges.

APPLICATIONS

- For use with traditional, high- and low-profile 200 mm process wafer carriers used in wet processing applications

FEATURES & BENEFITS

PFA material of construction	Provides broad chemical compatibility, enabling use in numerous high-purity, corrosive wet processing applications
End-load and slingshot configurations	Provide process flexibility and versatility
One-piece molded construction	Eliminates assembly, saving time
Robust, durable design	Allows reliable handling of traditional wafer process carriers up to 50 capacity

End-load and slingshot style handles are available.

SPECIFICATIONS

Material of construction	PFA	
Profile	High, low	
Overall size	End-load style:	465 mm x 71 mm x 27 mm (18.3" x 2.8" x 5.0")
	Slingshot style:	31 mm x 254 mm x 287 mm (1.2" x 10.0" x 11.3")

ORDERING INFORMATION

PART NUMBER	HANDLE	PROFILE
A057-1-0215	End-load	Low
A057-2-0215	End-load	High
A192-80-04-0215	Slingshot	High
