

**200 MM PROCESS
WAFER CARRIERS**

For wet chemical processing applications

FOR INTERNAL PRINT APPROVAL ONLY

for wet chemical processing applications

Overview

Our traditional molded PFA process wafer carriers and modular construction PFA process enhancement wafer carriers are designed for wet chemical processing applications. The open flow carrier allows solutions to pass through evenly and quickly. They are also constructed of chemical-resistant PFA material so your processes remain uncontaminated.

Process Enhancement Wafer Carriers

Features

- One-half the volume and mass of traditional process carriers
- One-fourth the surface area of traditional process carriers
- Modular construction includes reinforcement rods for added rigidity and strength
- Lift points on carrier ends for automated handling
- V-notch locators on carrier ends and rails for location on equipment
- Wafer capacity: 50
- Pocket spacing: 6.4 mm (0.25")

Traditional Process Wafer Carriers

Features

- Low and high profile
- "H" bar for equipment interface
- Locating track notches at the center of the thirteenth pocket
- Pins and holes on the top rail (unless noted)
- Wafer capacity: 25, 26 or 50
- D1 dimension: 25.4 mm (1.00")
- Pocket spacing: A192-82M: 3.2 mm (0.13")
All others: 6.4 mm (0.25")
- Pocket flat: 1.7 mm (0.07")

Specifications

Materials:	PFA	
Temperature limits:	Continuous use (process enhancement)	165°C (329°F)
	Continuous use (traditional)	180°C (356°F)
	Wafer insertion	290°C (554°F)

A200-80MG-0215	25	Handle, ² flanges ⁵	No	E210	A057-2	Natural PFA	High profile
A200-81M-0215	26	Flanges ⁴	No	E210	Contact Entegris	Natural PFA	High profile, no pins and holes

¹ Standard size, high position ² Large size, high position ³ Wide outboard ⁴ Standard outboard ⁵ C-style outboard

Handles

Entegris offers end-load and slingshot style handles molded of natural PFA material for use with traditional process wafer carriers.

End-load Style

To use, slip the handle down through the handle slot on the end wall of the carrier. Press the handle downward until the angled edges on the bottom of the handle are past the bottom of the solid end wall of the carrier, then pull up.

- Overall size: 465 mm × 71 mm × 27 mm (18.3" × 2.8" × 5.0")
- Part numbers:
 - A057-1-0215 for use with low profile carriers with handles
 - A057-2-0215 for use with high profile carriers with handles

Slingshot Style

To use, simply slip the grooves of the handle over the top flanges of the carrier.

- Overall size: 31 mm × 254 mm × 287 mm (1.2" × 10.0" × 11.3")
- Part number:
 - A192-80-04-0215 for high and low profile carriers with handle stops

Identification Options

Entegris offers a variety of identification options for carrier identification, including:

- Laser marking
- Ceramic encapsulated or PFA laminated PTFE bar coding
- Radio frequency tags
- Encapsulated alphanumeric tags

Contact Entegris to determine a suitable identification method for your application.
