

H93 SERIES 300 MM SINGLE WAFER SHIPPER

Provides secure wafer protection in a convenient, easy-to-use package

Overview

Entegris is an industry leader in wafer shipping and handling and the H93 Series 300 mm Single Wafer Shipper is another in a long line of popular shippers. It is ideal for transporting individual wafers within the fab or between facilities.

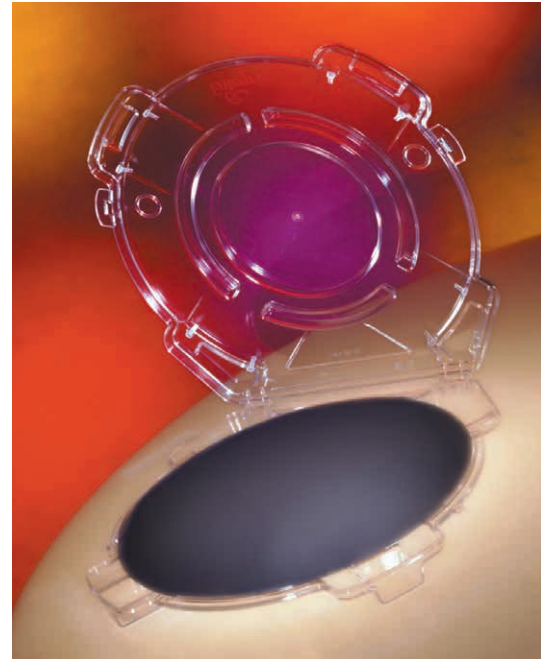

This shipper provides safe transport with limited surface contact because cushions hold only the wafer edge. Its clear clamshell-hinged design makes it easy to view, label and access the wafer. The H93 series is convenient and lightweight, yet is strong enough to protect wafers from damage and particle contamination during transport.

Secure Wafer Protection

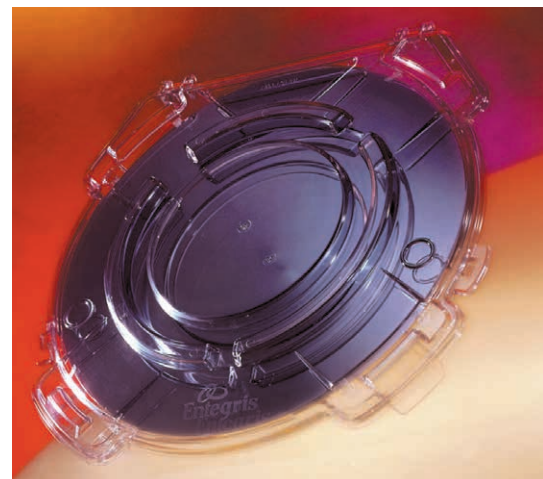

- Eight-cushion wafer retention system holds the wafer securely during storage and shipping
- Dual lever latches provide secure, reliable closure
- Stacking features allow shippers to stack safely and efficiently
- Additional packaging required to protect wafers during shipment

Convenient and Easy-to-Use

- Designed for wafer device-side down for simple wafer insertion and removal
- Pin in socket hinges allow the shipper to be opened horizontally, providing stability for wafer handling
- Keyed cushions assemble only one way for simple cushion replacement
- Smooth surfaces allow efficient cleaning and drying

Pins in socket hinges allow the shipper to be opened horizontally, providing stability for wafer handling.

Dual lever latches provide secure, reliable closure.

Specifications

- Cleanroom manufactured and packaged
- Overall size (L × W × H): 342.9 mm × 336.55 mm × 50.8 mm (13.5" × 13.25" × 2.00")
