

334 HP Half Dove Tail Housings

*Stainless steel filter housings for
DI water and organic solvents*

Entegris 334 HP half dove tail housings are manufactured from high-quality 316L stainless steel and recommended for use in high-purity chemical processing. The housings have good resistance to corrosive chemicals while its high-quality finish eliminates harmful contaminants from leaching into the process stream.

APPLICATIONS

334 cast HP half dove tail housings are designed for use in high-flow central applications in the manufacturing of flat panel displays, hard disks, semiconductors, and chemical suppliers.

FEATURES & BENEFITS

- Constructed of 316L stainless steel – provides excellent chemical resistance
- Upgraded O-ring groove design – half dove tail O-ring groove design prevents separation from the housing during filter changeout
- Easy filter changeout – screw-in clamp band enables easy filter changeout
- Improved connection and drain/vent ports – minimizing exposure to contaminants and maintaining high performance of the housing in high-pressure applications
