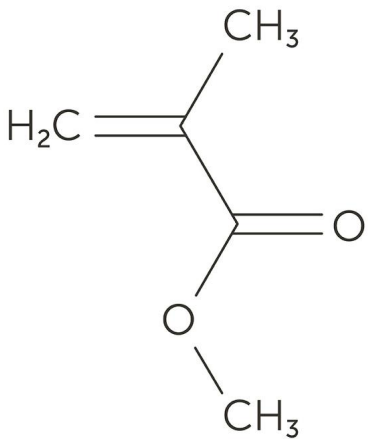
Methacrylates

Building block chemicals used to make polymers and plastics for medical device and industrial applications



As a leader in specialty chemicals and advanced materials for the microelectronics, life sciences, and other high-tech industries, we can accelerate your new product development efforts and manufacturing supply chain by providing critical materials at the appropriate scale, and within the communi-cated delivery schedule. Our portfolio of methacrylates is tailored to your manufacturing requirements and specifica-tions to meet your high-quality customized needs.

We offer a wide variety of methacrylates, a class of "building block" chemicals used to make polymers and plastics for a myriad of medical devices and organic synthesis processes. Stability, durability, hardness, and scratch resistance are among many beneficial properties that make our methacrylates ideal for a wide variety of applications.

Our experienced R&D teams provide deep chemistry expertise in an innovative culture to deliver custom synthesis solutions that meet your proprietary development needs. With our extensive manufacturing capabilities, we can handle a range of projects from grams to metric ton quantities, through scale-up and full commercialization. We also provide chemical process development, piloting, and custom chemical manufacturing.

APPLICATIONS

- Organic synthesis in chemical manufacturing processes
- Eye and wound care products
- Dental products
- Paints and coatings

FEATURES & BENEFITS

A monomer with properties such as transparency, flexibility, toughness, and hardness	Provides specific properties to the polymer resin enabling use in a variety of applications
Customer collaboration	Proactive and regular team communication and encouraged site visits enable beneficial idea exchange and enhance on-track progress
Advanced scientific expertise	Technical transfers, R&D, scale-up optimization, and continuous improvement are conducted by PhD chemist-led teams that are supported by world-class quality and analytical resources
ISO 9001 certification	The Entegris quality management system (QMS) certified by the ISO 9001 standard ensures provision of consistent quality products meeting customer and regulatory requirements

SPECIFICATIONS

Our products are made to strict specifications and our experienced R&D teams can partner with you to meet your proprietary development needs. With our manufacturing capabilities and resources, we can deliver on communicated timing requirements as well as high-quality customized solutions. Contact us with your specifications.
