

SmartCap™ Closure

Key-coded closure with donut breakseal for misconnect prevention

SmartCap™ closures are used together with the NOWPak® liner-based Bottle System and PDMPak® Bottle System for Pressurized Applications to seal the bottles after they are filled with chemical. The chemical-specific mechanical key-code mates with the ErgoNOW™ connector to ensure the correct chemical is connected to the correct dispense system.

APPLICATIONS

- Designed for applications where multiple chemicals are used

FEATURES & BENEFITS

- Mechanical key-code mates only to the corresponding ErgoNOW key-coded connector to prevent dispensing the wrong material
- Breakseal closure minimizes exposure of critical materials to the environment during installation of the dispense connector
- Closures are custom coded to uniquely identify customers' critical materials
