

PrimeLock® Elbow Adapter, MNPT

A premium PFA fitting for high-purity and corrosive chemical applications

Entegris has supplied innovative connection technology into the high-purity chemical handling markets for over 30 years. Our PrimeLock® fittings (available in sizes from 1/4" to 1") are clean, robust, and very easy to assemble. With audible and visual indicators, users can quickly verify the proper makeup of the connection. Heat is not required to assemble this fitting, saving time and money.

PrimeLock fittings perform effectively in the most demanding chemical applications at both ambient and elevated temperatures. The ultraclean design provides enhanced reliability within your system, with an all-PFA wetted construction. PrimeLock fittings are fully tested using our stringent testing and qualification methodology. This extremely robust, clean fitting is the most reliable connection technology on the market.

APPLICATIONS

- High-purity, corrosive chemical handling
- Semiconductor applications
 - Photolithography
 - Bulk chemical delivery
 - CMP
 - Wet etch and clean
 - High-temperature cleaning processes
- Solar, LED, flat panel display
- Excellent performance with low surface tension chemistries

PrimeLock elbow adapter, MNPT, available in sizes up to 1"

FEATURES & BENEFITS

Ease of assembly	Provides consistent and repeatable fitting makeup
All wetted PFA components	Offers broad chemical compatibility
Robust thread design	No cross-threading, quick makeup, increased sealing force
Unique seal design	Nonwetted insert reduces entrapment, leak points, and flow interruptions
No heat required to flare tubing	Saves time and money; reduces operator variability
Connection verification ring	Audible and visual indication of proper fitting makeup
Capable of elevated temperature ratings, all sizes	Simplifies product selection and is compatible with high-temperature chemical processes
Innovative dual-wrench design for 1 1/2" or 40 mm nuts	Make it easier to assemble fittings, saving time and money

SPECIFICATIONS

Pipe Thread (NPT) Assembly Procedure

1. Apply PTFE tape or paste sealant to MNPT threads starting one thread back from end of fitting.
 - When using tape, tightly wrap in direction of threads to conform tape to thread shape.
 - a. Use 3-1/2 to 4 wraps of tape when assembling PFA threads to PFA material.
 - b. Use 4 to 5 wraps of tape when assembling PFA threads to a material other than PFA.

2. Thread the fitting onto the mating component until hand tight.

3. Using a wrench, tighten fitting about 4 turns past hand tight.

PTFE tape = 1/2" wide for all NPT fittings

Note: PTFE tape is not recommended for use in a gaseous application.
