ADVANCED WAFER TRANSPORT

Trends in wafer processing technology have mandated advancements in wafer carrier technology to support today’s advanced semiconductor processing facilities. Wafer carriers designed for advanced wafer transport offer dramatic performance benefits over traditional low- and mid-range wafer carriers, including:

- **Precise wafer access** – the wafer is in a precise and predictable location
- **Reliable equipment operation** – on process tools and automated materials handling systems
- **Secure wafer protection** – from contamination and damage

---

**Fab Technology Trends**

- High-efficiency devices
- Compound semiconductor materials
- Tool uptime
- Copper processes
- Automation levels
- Tool throughput
- Design rules
- Additional mask layers
- Process temperatures

**Wafer Carrier Material Characteristics**

- Outgassing at high temperatures
- Thermal capabilities
- Electrostatic discharge
- Dimensional stability
- Particulation
- Value
MUL TE Wafer Shipping Boxes

ULTRAPAK® Series

- Individual horizontal cantilever springs limit wafer rotation to reduce particle contamination and also secure the wafers in the cassette to safeguard against breakage
- Ultrapure polypropylene materials provide a clean shipping environment and assure low levels of condensable inorganics
- Horizontal and vertical robotic pickup flanges on the cassette allow convenient handling
- Center notch track alignment and "H" bar ensure accurate equipment interoperability both vertically and horizontally
- Three design options to accommodate varying wafer thickness

SINGLE WAFER SHIPPING BOXES AND TRAYS

H93 SERIES SHIPPING BOX

- For shipping and storage applications
- Holds one wafer face down contacting only the wafer’s edges
- Replaceable cushions securely retain the wafer to minimize particle generation
- Single latch provides secure closure and easy opening
- Tweezer slots conveniently located for easy wafer handling
- Large top surface provides a convenient space for labeling
- Stackable shipping boxes allow efficient use of storage space
- Pin-in-socket hinges allow the shipper to be opened horizontally, providing stability for wafer handling
- Clear polycarbonate material allows visual inspection without opening
- Optional STAT-PRO® 500 black conductive polycarbonate material provides static protection
- Overall size: 175 mm × 160 mm × 20 mm (6.9” × 6.3” × 0.8”)

SOLOPAK® SERIES SHIPPING BOX

- For shipping and storage applications
- Holds one wafer face down or face up in a conical pocket contacting only the wafer’s edges
- Flat or notch locators prevent wafer rotation to minimize particle generation
- Dual latch provides secure closure and easy opening
- Tweezer slots conveniently located for easy wafer handling
- Large top surface provides a convenient space for labeling
- Stackable shipping boxes allow efficient use of storage space
- Pin-in-socket hinges allow the shipper to be opened horizontally, providing stability for wafer handling
- Clear polycarbonate material allows visual inspection without opening
- Overall size: 173 mm × 162 mm × 16 mm (6.8” × 6.4” × 0.6”)

H22 SERIES SHIPPING BOX

- For shipping and storage applications
- Holds one wafer face down in a conical pocket contacting only the wafer’s edges
- Spring securely retains the wafer to minimize particle generation
- Screw on cover provides secure closure and easy opening
- Large top surface provides a convenient space for labeling
- Stackable shipping boxes allow efficient use of storage space

H20 SERIES TRAY

- For internal handling and storage applications
- Holds one wafer face down in a conical pocket contacting only the wafer’s edges
- Tweezer slots conveniently located for easy wafer handling
- Stackable tray on tray for efficient use of storage space
- Overall size:
  - H20-5000: 163 mm × 163 mm × 5 mm (6.4” × 6.4” × 0.2”)
  - H20-5001: 163 mm × 163 mm × 10 mm (6.4” × 6.4” × 0.4”)

TRANSPORT WAFER CARRIERS

194/196 SERIES
SUPERIOR AUTOMATION PERFORMANCE
• High rigidity and dimensional stability
• Four-point contact on the “H” bar and track for improved wafer positioning
• Open sidewall style
• High profile design for maximum wafer protection
• Locating track notches for the center of the thirteenth pocket
• “H” bar equipment interface
• Pins and holes on the top rail
• Wafer capacity: 25
• D1 dimension: 14.5 mm (0.57”)
• Pocket spacing: 4.8 mm (0.19”)
• Pocket flat: 1.5 mm (0.06”)

182 SERIES
THE INDUSTRY STANDARD 150 MM WAFER CARRIER
• High rigidity and dimensional stability
• Four-point contact on the “H” bar and track for improved wafer positioning (unless noted)
• Open sidewall style
• High profile design for maximum wafer protection
• Locating track notches for the center of the thirteenth pocket (unless noted)
• “H” bar equipment interface
• Pins and holes on the top rail
• Wafer capacity: 25
• D1 dimension: 14.5 mm (0.57”)
• Pocket spacing: 4.8 mm (0.19”)
• Pocket flat: 1.5 mm (0.06”)
Next generation advanced wafer transport carriers shown in **bold blue**. Advanced wafer transport carriers shown in **bold**.

PROCESS WAFER CARRIERS

194 SERIES
SUPERIOR PROCESS CARRIER
AUTOMATION PERFORMANCE

- Improved process carrier rigidity and dimensional stability
- Four-point contact on the “H” bar and track for improved wafer positioning
- Open sidewall design to minimize liquid traps and promote even solution coverage and drainage
- High profile design for maximum wafer protection
- Locating track notches for the center of the thirteenth pocket
- “H” bar equipment interface
- Pins and holes on the top rail
- Chemical resistant natural PFA material
- Wafer capacity: 25
- D1 dimension: 14.5 mm (0.57”)
- Pocket spacing: 4.8 mm (0.19”)
- Pocket flat: 1.5 mm (0.06”)

190 SERIES
LOW PROFILE FOR OPTIMUM PERFORMANCE
IN CENTRIFUGAL APPLICATIONS

- Low contour for improved spray penetration to the wafers
- Open sidewall design to minimize liquid traps and promote even solution coverage and drainage
- “H” bar equipment interface
- Pins and holes on the top rail
- Chemical resistant natural PFA material
- Wafer capacity: 25
- D1 dimension: 14.5 mm (0.57”)
- Pocket spacing: 4.8 mm (0.19”)
- Pocket flat: 1.4 mm (0.05”)

**STORAGE BOXES**

**E160 SERIES**

**OPTIMUM PERFORMANCE AND REDUCED PARTICLE GENERATION**

- Five degree wafer tilt from wafers vertical allows wafers to rest on their backsides, reducing movement and particle generation
- Smooth surfaces for easy cleaning and low particle generation
- Pin and socket hinges with retainers for improved durability
- Stackable
- Single carrier capacity
- Compatible carriers: All 25-capacity without handles
- Overall dimensions: 195 mm × 203 mm × 211 mm (7.7” × 8.0” × 8.3”)

**E124 SERIES**

**THE INDUSTRY STANDARD 150 MM STORAGE BOX**

- Automation compatible
- Smooth surfaces for easy cleaning and low particle generation
- Drop front allows easy access by robotic end effectors
- Robotic compatible slide latch
- Rotating pin and socket hinges prevent box from tipping when open
- Stackable
- Single carrier capacity
- Compatible carriers: All 25-capacity without handles
- Overall dimensions: 213 mm × 213 mm × 190 mm (8.4” × 8.4” × 7.5”)

**E90 SERIES**

**MAXIMUM STACKING DENSITY FOR SPACE LIMITED STOCKERS AND WIP RACKS**

- Smooth bottom
- Pin and socket hinges
- Stackable
- Single carrier capacity
- Compatible carriers: 182 series and 194/196 series 25-capacity without handles
- Overall dimensions: 208 mm × 193 mm × 188 mm (8.2” × 7.6” × 7.4”)

**E206 SERIES**

**REDUCED PARTICLE GENERATION AND ENHANCED ROBOTIC INTERFACE**

- Automation compatible
- Twenty degree wafer tilt from wafers horizontal allows wafers to rest on their backsides, reducing movement and particle generation
- Smooth surfaces for easy cleaning and low particle generation
- Keyed pin and socket hinges are free rotating and easy to assemble and disassemble
- Stackable
- Single carrier capacity
- Compatible carriers: All 25-capacity without handles except A190 series low profile process carriers
- Overall dimensions: 439 mm × 274 mm × 216 mm (17.3” × 10.8” × 8.5”)
**H3150 SERIES**

Optimum Performance and High Storage Density

- Five degree wafer tilt from wafers vertical (unless noted) allows wafers to rest on their backsides, reducing movement and particle generation
- Smooth surfaces for easy cleaning and low particle generation
- Low profile base allows easy access to wafer carrier end wall flanges
- Rotating pin and socket hinges prevent box from tipping when open
- Stackable (unless noted)
- Two carrier capacity

STORAGE BOX ACCESSORIES

TRAVELER ENVELOPES

• Flexible envelopes snap onto covers
• Compatible with most 150 mm storage boxes

Ordering Information

IDENTIFICATION OPTIONS

Entegris offers various identification options including:

• Laser marking
• Hot stamping
• Bar code labels
• Radio frequency tags
• Cardholders
• Booklet holders
• Run card slip
• Colored ID tags

Contact Entegris to determine a suitable identification method for your application.
General material information is provided for your reference. Contact Entegris for additional information.

OTHER PRODUCTS

Additional products and services to support your 150 mm wafer processing needs include:

• Mask and reticle packages
• Finished wafer shipping products
• Bare die and packaged IC shipping and handling products
LIMITED WARRANTY

Entegris' products are subject to the Entegris, Inc. General Limited Warranty. To view and print this information, visit entegris.com and select the Legal & Trademark Notices link in the footer. Entegris does not warrant any failure in the case of customers using unapproved foreign components.
