

Entegris Invests \$30M to Expand FOUP and Wafer Shipper Manufacturing

30% increase in total capacity to meet customer demands for the next decade

SHANGHAI, CHINA/ SUWON, KOREA – July 11, 2018 – Entegris, Inc. ([Nasdaq: ENTG](#)), a leader in specialty chemicals and advanced materials solutions, announced today that it is investing USD 30 million to expand its state-of-the-art clean manufacturing facility in Kulim, Malaysia to meet the surging demands of Asian customers, especially in China and Korea.

The expansion will increase Entegris' manufacturing capacity of its market-leading 200 mm and 300 mm wafer handling and shipping products, including advanced technology FOUPs. When complete, the capacity of Kulim facility increases over 30%. Entegris will begin shipping from the newest production line within the next three months.

"The demands for our industry leading FOUPs and other advanced material handling products in Asia, especially in China and Korea, are on the rise, and we expect the trend to continue in the next decade," said Bill Shaner, senior vice president of Advanced Materials Handling Division at Entegris. "With the expansion and the close proximity of the Kulim facility to Asian semiconductor manufacturers, Entegris will be better positioned to fulfill increasing customer demands to support their growth."
