## Yohan Ahn

*Director, Business Development,  
Microcontamination Control*

Mr Ahn joined Entegris over three years ago and is currently working with key customers to help solve microcontamination challenges. His broad area of responsibilities include providing guidance and solutions for liquid, gas and air filtration in semiconductor processes.

Prior to joining Entegris, Mr. Ahn spent 18 years working for Samsung's semiconductor manufacturing business. For 15 of those years, he was part of the microcontamination control technology team where he established microcontamination controls and monitoring systems for cleanrooms and tools. For three years, he was part of the cleanroom technology team. During his time at Samsung, Mr. Ahn also participated on several task force teams that included work in ArF immersion, EUV lithography, nano-particle contamination and yield enhancement.

Mr. Ahn holds a bachelor's degree in electronic materials engineering from Kwangwoon University.
